

## Street cleaning, maintenance, and winter road services

When it comes to street cleaning as well as highway maintenance and winter road services, the focus is on maintaining a high degree of safety and cleanliness without losing sight of cost-effectiveness.

### Road maintenance service

Here you will find manufacturers and suppliers of products and integrated systems for road maintenance on traffic areas and their adjacent areas in the vegetative period from spring to autumn.

Machines for mowing roadsides and embankments, pruning shrubs and maintaining embankments and ditches, removing weeds from pavements and gutters and washing traffic surfaces will be exhibited.

### Winter road maintenance

Here you will find manufacturers and suppliers of products and integrated systems for winter service on traffic areas.

Snow ploughs, snow blowers and snow blowers and sweeping machines for clearing traffic routes of snow masses, spreading machines in various sizes for the distribution of thawing or blunting spreading materials up to modern spray ironers for the distribution of liquid spreading materials are presented.

Ice early warning systems for the measurement of road and environmental conditions as well as digital management software systems, PC-based or on mobile Smartphone Apps, as support for the performance of a professional operational service are also found in the product portfolio of the suppliers.
