

Water Treatment and Flood Control (THW)

Save the date

IFAT

Date: May 4 - 8, 2020

IFAT 2018 presented mobile devices for drinking water treatment live in action.

The Federal Agency for Technical Relief (THW) delivered an impressive and professional display of their expertise in delivering crisis intervention both at home and abroad. Drinking water treatment, and measures to limit oil damage were the focus of this live demonstration. Among many other things, the show also featured systems for soil collapse protection, drinking water transport and flood crossings.
