

Reasons to attend

Environmental technologies provide solutions and strategies for all sectors. Exhibitors at the World's Leading Trade Fair for Water, Sewage, Waste and Raw Materials Management develop innovative technologies to improve production processes and help to make more efficient use of raw materials. At IFAT 2018, discover sustainable responses to the key questions of the future.

Save the date

IFAT

Date: May 4 - 8, 2020

IFAT for municipalities, private utilities and waste management organizations

What are the efficient ways to design water supply and disposal systems? What is the best way to separate and dispose of waste?

→ Reasons for municipalities, private utilities and waste management organizations

IFAT for industry, the manufacturing sector and trade

How can gray-water and industrial wastewater be used efficiently? What are the latest environmental technologies innovations for example for the food industry?

→ Reasons for industries, the manufacturing sector and trade

IFAT for consultants, public organizations, service providers, engineering offices, associations

IFAT 2018 is a must-attend event for service providers in the sectors of water and sewage, and waste and secondary raw materials.

→ Reasons for consultants, engineering offices and public organizations

IFAT for universities, vocational schools, science and research

The World's Leading Trade Fair demonstrates how today's environmental technologies are already providing sustainable ways to handle resources.

→ Reasons for science and research
